When printing the PDF file, please make sure that your page scaling options are set to 'none'. In the printout, the lines below should measure exactly 1 inch.

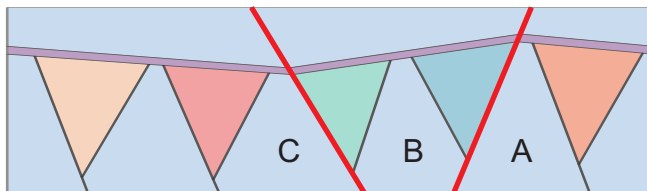

In conjunction with:

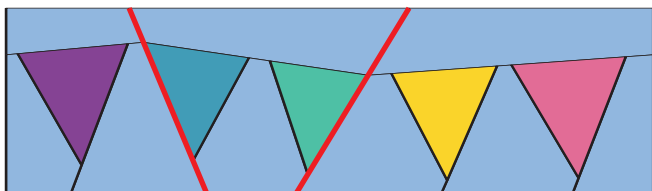

Finished size: 3" x 10" (25 x 7,5 cm) plus seam allowances.

Front

Back

**Tip:**  
 You may leave out the sewn string and coach a cord instead.

Use paper piecing to sew the individual sections and join according to the diagram.

If you want a longer border you may elongate it by using single pattern units. Straighten the edges by the chosen measurement and draw a new seam allowance. There is an example on page 2.

Make sure the flags meet at an upper corner. Eventually you may need to flip your drawing.

Check out my paper piecing tips at [www.reginagrewe.de/index\\_e.html](http://www.reginagrewe.de/index_e.html)

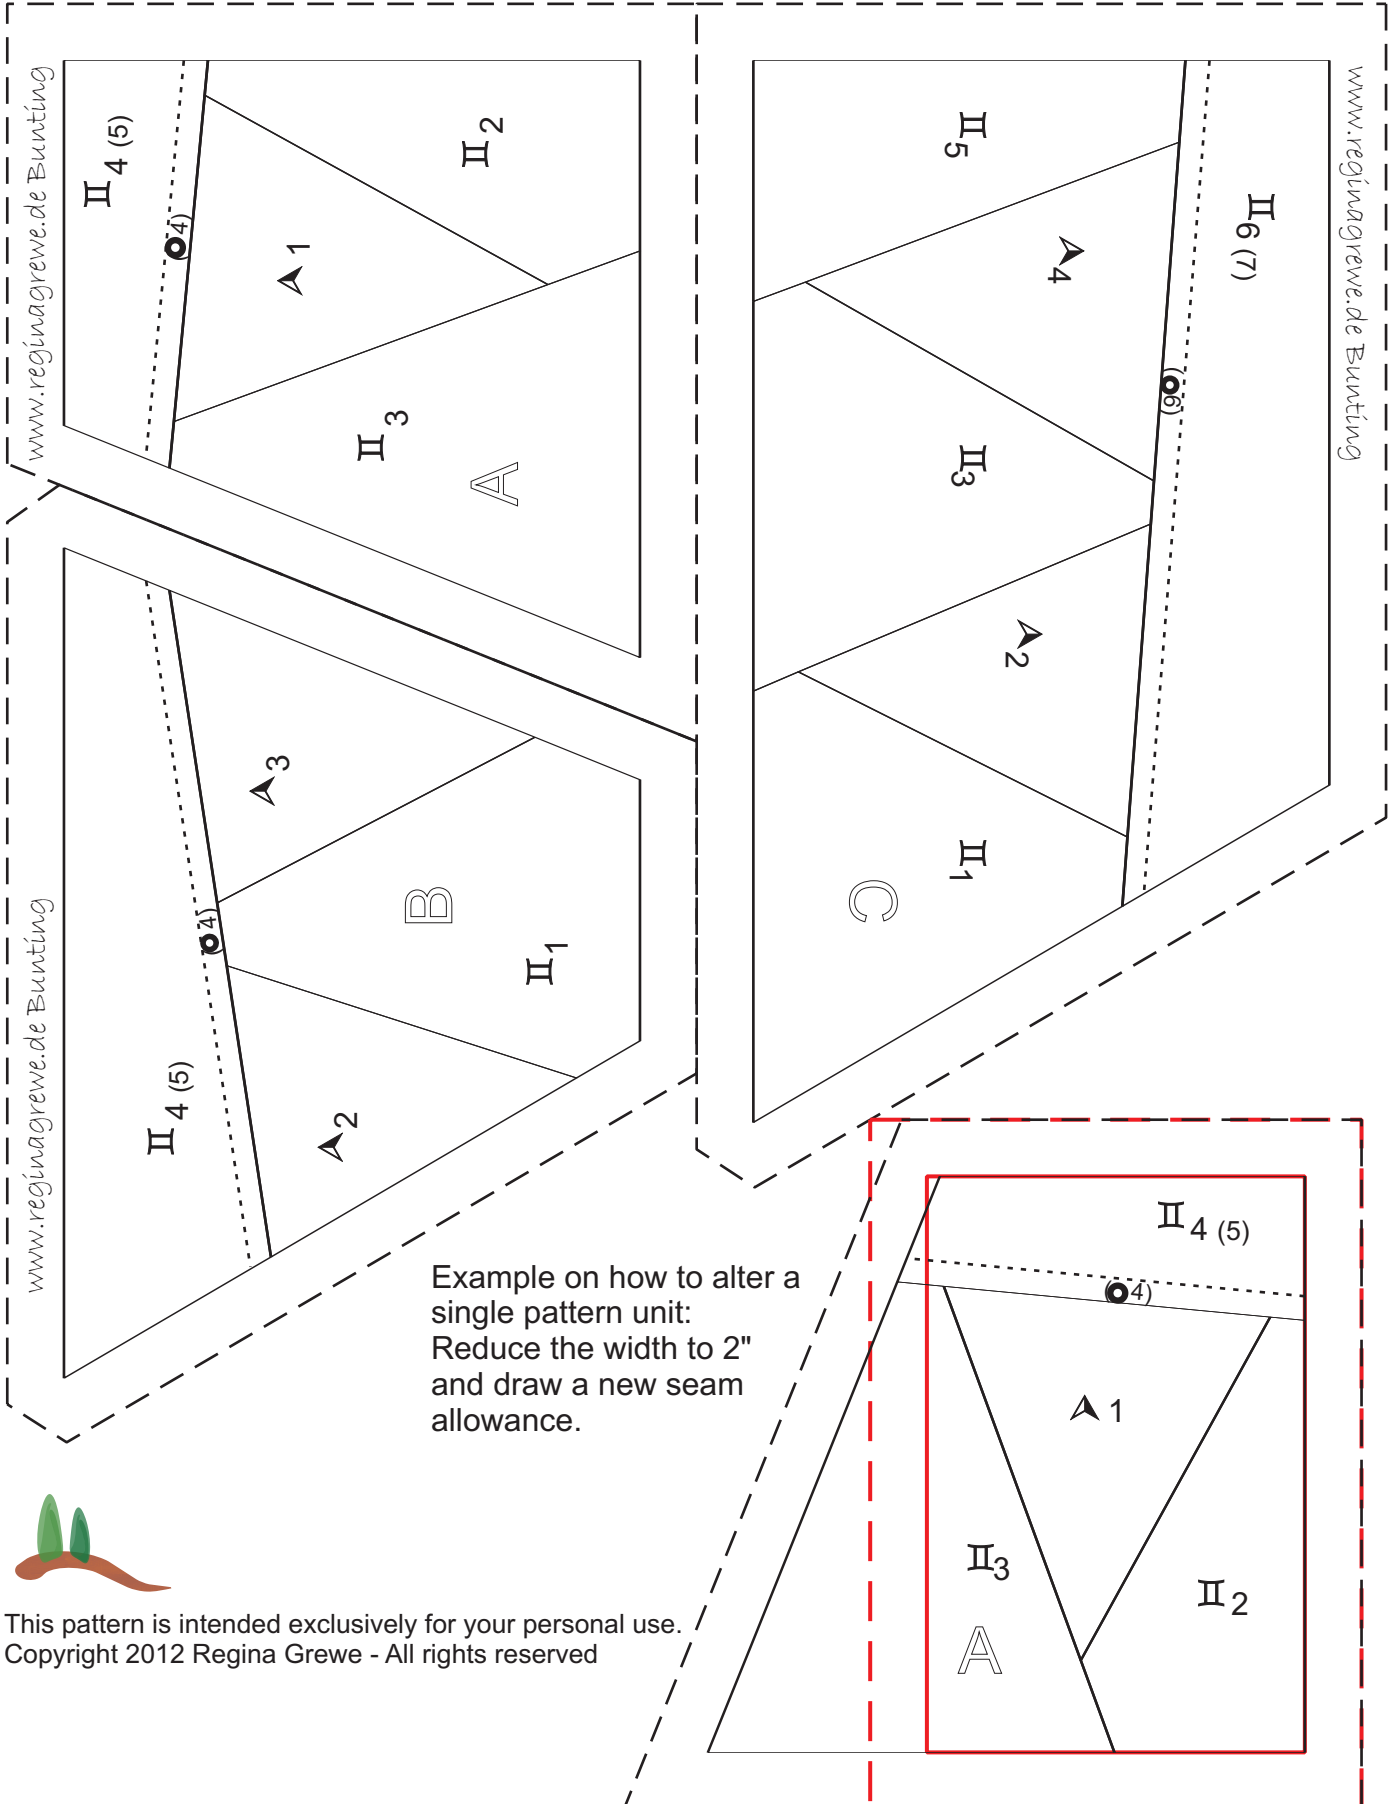

...especially „How to Shift and/or Rotate a Block Motif“.

You can easily change the size of blocks to your needs by adjusting the page scaling in the printer settings of your computer or copier. Here is the formula:  
 $(\text{Desired size}) / (\text{Actual size}) \times 100 = \text{percentage for scaling}$   
 Example: If you want to enlarge a block from its actual size of 6" to 8", you calculate:  $8" / 6" \times 100 = 133,33 \%$ .

- II Background
- ▲ Flag
- String

Example on how to alter a single pattern unit:  
Reduce the width to 2" and draw a new seam allowance.
